

Ideation Phase – Empathize & Discover

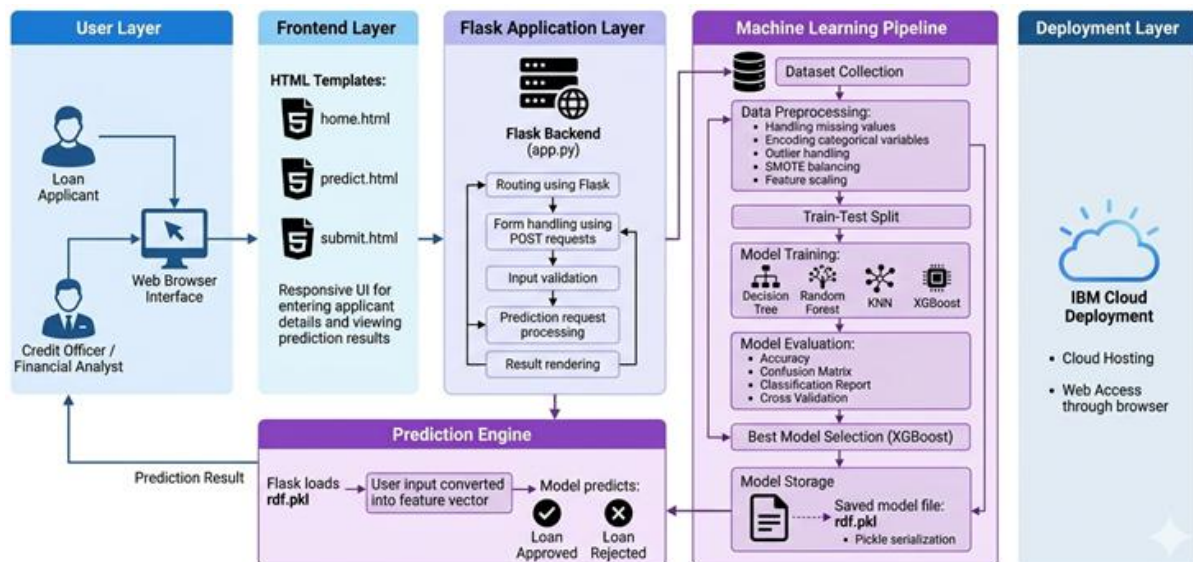

Date: 25 June 2026

Team ID: XXXX

Project Name: Smart Lender

Maximum Marks: 4 Marks

Empathy Map Canvas

Loan Applicant / Bank Loan Officer

Speaks

- "I want my loan approval process to be quick."
- "I need a fair and accurate decision."
- "I don't want to submit unnecessary documents repeatedly."
- "The approval process should be transparent."
- "I want to know my loan eligibility instantly."

Thinks

- "Will my loan be approved?"
- "Is my credit history good enough?"
- "Will the bank reject my application?"
- "Can technology make the process faster?"
- "I hope the decision is unbiased."

Does

- Fills out the loan application form.
- Uploads required documents.
- Waits for loan verification.
- Checks loan status regularly.
- Compares different loan options before applying.

Feels

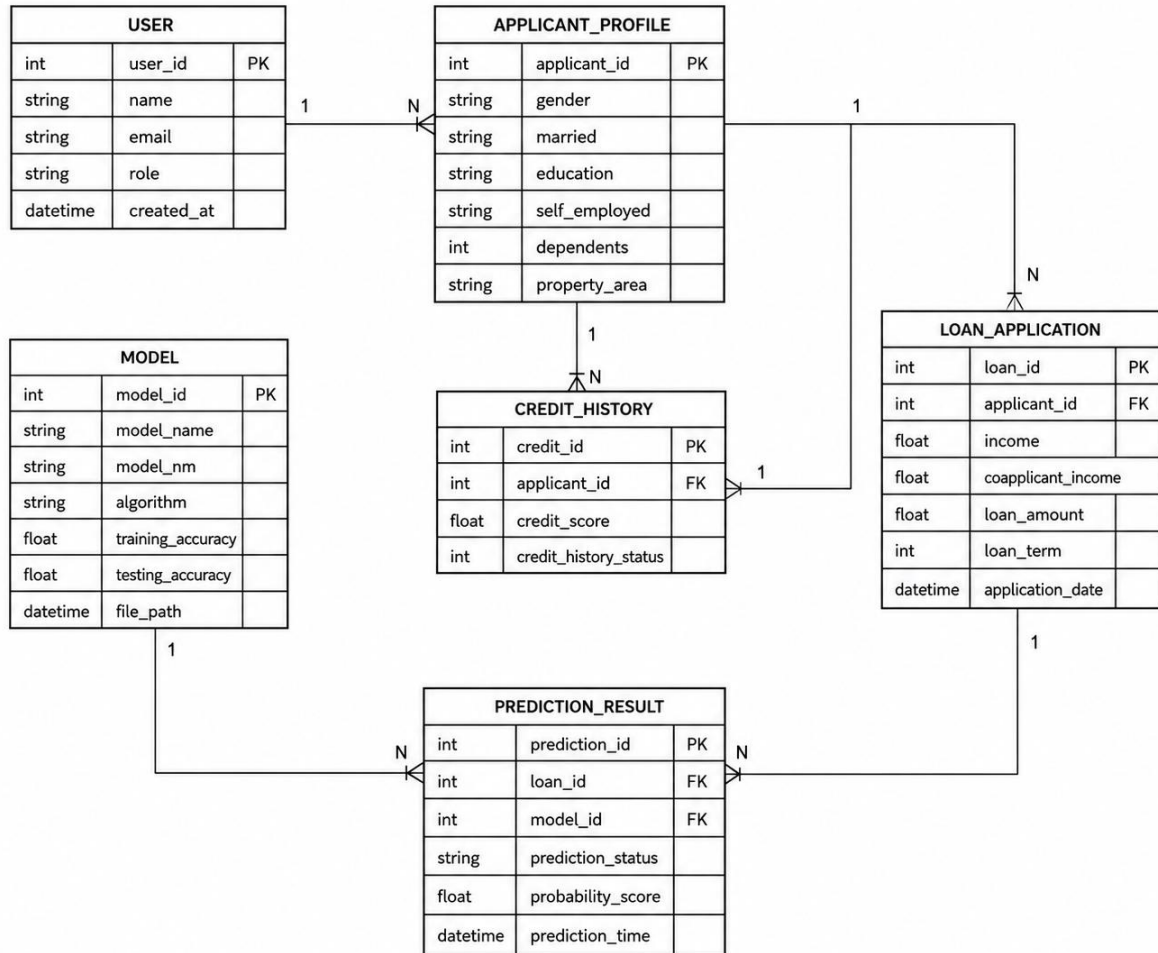

- Anxious while waiting for approval.
- Confused about eligibility criteria.
- Frustrated by lengthy processing times.
- Happy when the application is processed quickly.
- More confident if the system provides accurate predictions.

Pain Points

- Long loan approval time.
- Manual verification delays.
- Human errors during evaluation.
- Lack of transparency.
- Uncertainty about loan eligibility.
- High chances of application rejection after a long wait.

Customer Needs

- Fast loan approval process.
- Accurate prediction of loan eligibility.
- Easy-to-use online application.
- Fair and unbiased decision-making.
- Reduced paperwork.
- Instant loan approval or rejection result.

Smart Lender Solution

The **Smart Lender** system uses a **Random Forest Machine Learning model** to analyze applicant details such as income, education, employment status, credit history, loan amount, and property area. It predicts whether a loan is likely to be approved or rejected, helping banks make faster, more accurate, and data-driven decisions while improving the overall customer experience.
