

Customer Journey Map

Date: 26 June 2026

Team ID: XXXXX

Project Name: Smart Lender

Maximum Marks: 2 Marks

Journey Stage	Customer Actions	Touchpoints	Customer Thoughts & Feelings	Process Owner	Improvement Opportunities
1. Need Identification	Customer decides to apply for a loan.	Bank website, advertisements, customer support.	"I need financial assistance and want a reliable loan process."	Customer / Bank	Provide clear loan information and eligibility criteria.
2. Application Submission	Enters personal, financial, and loan details into the Smart Lender application.	Smart Lender web application.	"The application should be simple and easy to complete."	Customer	Create a user-friendly form with input validation.
3. Data Processing	Submitted information is processed by the Machine Learning model.	Flask backend and Random Forest model.	"I hope my details are evaluated accurately."	Smart Lender System	Ensure fast, secure, and accurate prediction.
4. Prediction Result	Receives loan approval or rejection instantly.	Result page of the web application.	"I'm relieved to receive a quick decision."	Smart Lender System	Display clear results with understandable messages.
5. Decision & Next Steps	Uses the prediction to proceed with the loan process or improve eligibility.	Bank or financial institution.	"Now I know my loan eligibility and what to do next."	Bank / Customer	Provide guidance for rejected applicants and next steps for approved applicants.

Customer Journey Summary

The Smart Lender system simplifies the customer journey by reducing manual verification, providing instant loan eligibility predictions, and improving the overall loan application experience. By integrating a Machine Learning model with a web application, the system helps banks make faster and more consistent lending decisions while offering applicants a transparent and efficient process.
