

Project Design Phase – II

Data Flow Diagram & User Stories

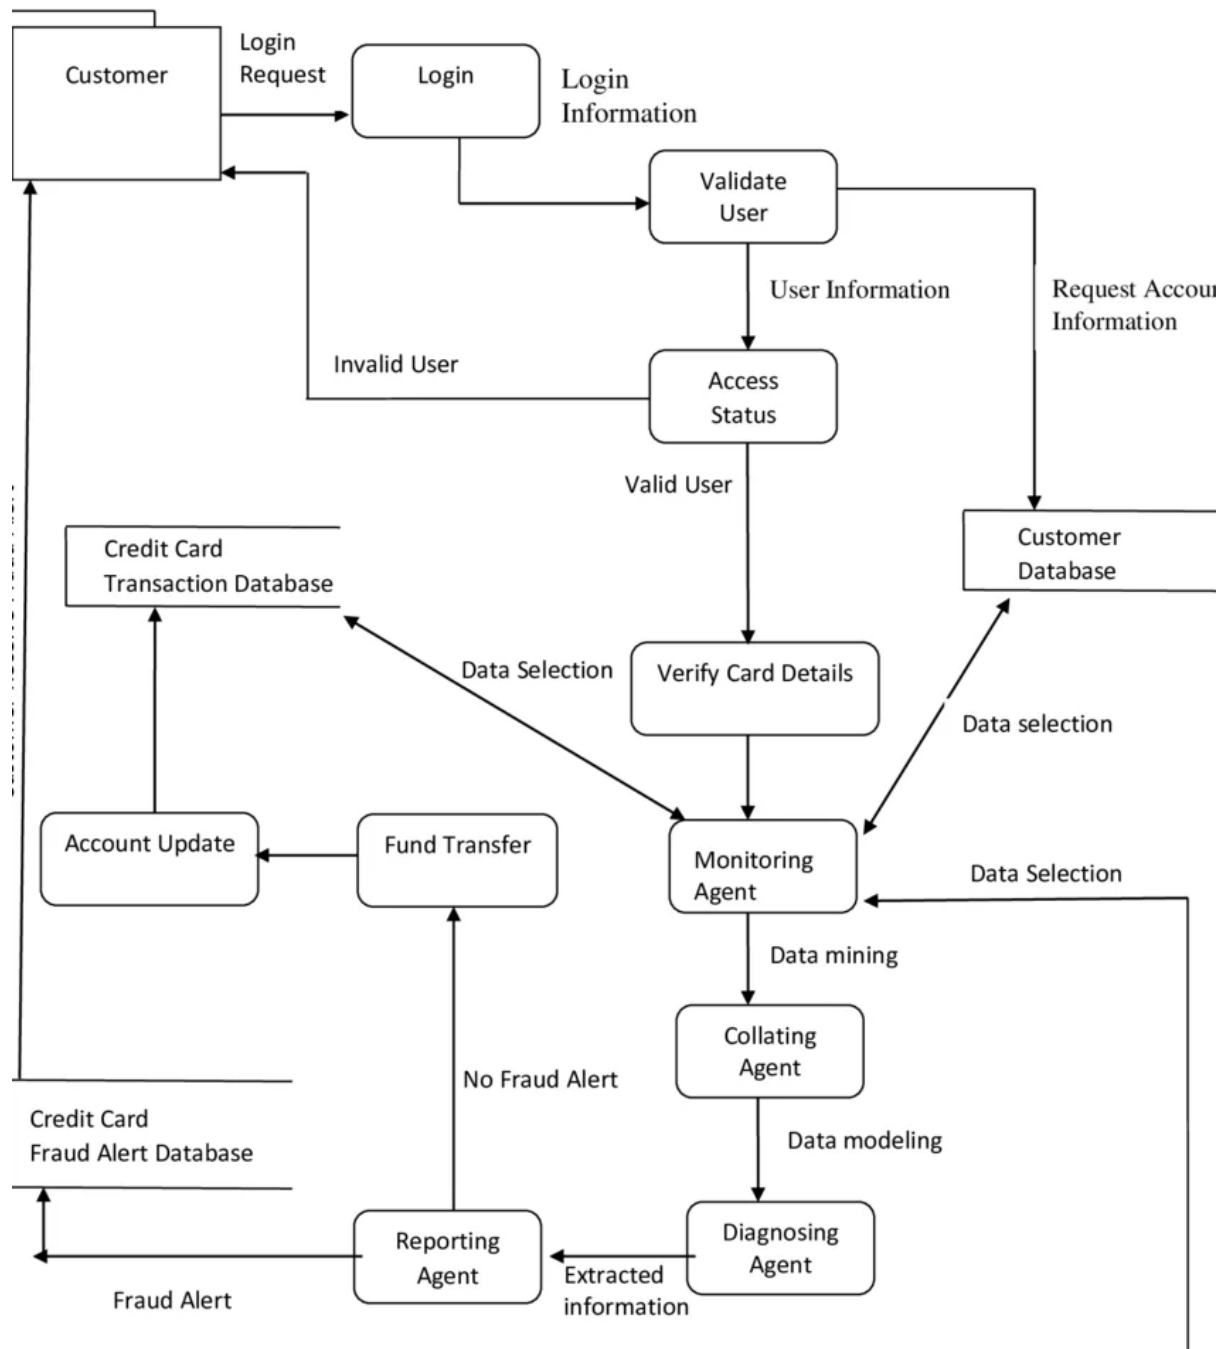

Date: 26 June 2026

Team ID: XXXXX

Project Name: Smart Lender

Maximum Marks: 4 Marks

Data Flow Diagram (DFD)

User Stories

User Story 1 – Loan Applicant

As a loan applicant,

I want to enter my personal and financial details,

So that I can quickly know whether my loan is likely to be approved.

User Story 2 – Bank Officer

As a bank officer,

I want the system to evaluate loan applications automatically,

So that I can reduce manual work and make faster lending decisions.

User Story 3 – System Administrator

As a system administrator,

I want the application to process user data securely and accurately,

So that the prediction results are reliable, and the system performs efficiently.

User Story 4 – Financial Institution

As a financial institution,

I want to reduce loan default risks using Machine Learning,

So that the organization can improve decision quality and operational efficiency.

Expected System Output

- Collect applicant details through a web interface.
- Validate and preprocess the input data.
- Use the trained **Random Forest (rdf.pkl)** model to predict loan approval.
- Display **Loan Approved** or **Loan Rejected** instantly.
- Help banks make faster, consistent, and data-driven lending decisions.
